

CALL FOR APPLICATIONS

The **Italian Centre for International Development (ICID)** - established by *CEIS at the University of Rome Tor Vergata*, the *Department of Social Sciences and Economics at Sapienza University of Rome*, and the *Department of Economics at Roma Tre University* - in collaboration with the *Rossi-Doria Centre for Economic and Social Research*, the *International Fund for Agricultural Development (IFAD)*, the *Food and Agriculture Organization (FAO)*, and the *World Bank's Institute for Economic Development*, is organizing:

8th Edition of the International School for Advanced Training “Impact Evaluation of Development Policies: *Concepts, Methods, Applications*”

22nd June – 3rd July 2026

Objective

The School is designed to serve the needs of government and non-governmental organization officials, private professionals and practitioners, researchers and doctoral students with an interest in development and public policy evaluation. The objective is to provide participants with the skills and competencies for impact evaluations of development policies and programs. This will be achieved through a focus on both a “hands-on” approach to the discussion of specific examples of policies and programs, and also on the most recent analytical techniques.

Organization

The School focuses on three pillars:

- **CONCEPTS**
Identification of the policy framework (e.g. policy maker’s objectives, program beneficiaries, contextual factors).
- **METHODS**
Identification of the key instruments for assessing the policy’s impact. How to select the most suitable tool in light of the specific context and how to apply it.
- **APPLICATIONS**
The practice of the policy’s impact evaluation. How to carry out the evaluation exercise, useful data sources and data collection, software and main statistical packages. This will be mainly achieved in the hands-on sessions in the afternoon.

The School will be held **from 22nd June to 3rd July 2026 in the form of an on-line course**. The morning sessions will provide an introduction to the topics, with practical applications to specific case studies in the field. The afternoon sessions will be devoted to technical, hands-on sessions. The course will include students’ assignments under supervision and tutorship.
